## PRESS RELEASE

### Presidential Sculptor, Keith Johnson, Releases New Donald Trump Sculpture Series

*Multiple editions capture the essence of the #MAGA movement*

**FOR IMMEDIATE RELEASE Atlanta, Georgia 2022:** Renowned Presidential Sculptor, Keith Johnson, has announced a new sculpture series featuring the 45th President, Donald J. Trump. Originally crafted in 2016, Mr. Johnson believes it is time to revisit the impact, influence, and contributions of the 45th President.

The series, made from museum-quality bronze and in various sizes, has four unique busts: "Presidential", "Statesman", "MAGA King", and "Commander in Chief"; each featuring their own unique story and angle on the impact and influence of Donald Trump. "I sought to provide people with a personal monument to one of the most influential Presidents and political movements in American history, that will last for years to come," says artist Keith Johnson.

The "Commander in Chief" bust highlights the similarities between Donald Trump and George Washington, which is reflected in the colonial era and revolutionary war design of the bust, and is considered the most unique and most popular bust. "Statesman" captures the strength and courage of President Trump on an international scale, with a unique focus on the American flag pinned suit and the firm gaze in Trump's eyes. "MAGA King" displays the Donald Trump seen at rallies across the nation, with the now famous "Make America Great Again" hat and strong facial expression. Lastly, "Presidential" is a limited edition life-size bust, measuring twenty-one inches tall, eleven inches wide, and eleven inches deep. This bust was also presented to then-candidate Donald Trump in a private viewing in 2016.

These historical busts capture the impact of both President Donald Trump and the MAGA movement on American politics. The busts can be purchased online at [www.donaldtrumpsculpture.com](http://www.donaldtrumpsculpture.com) and range in price from \$2,495 to \$150,000.
